

Home Made Bird Feeders

The birds love these, they have already been feeding on this one!

How to make a home made bird feeder:

- Take a clean empty toilet or kitchen roll holder
- Ask a grown up to help you to smear some peanut butter or honey or even butter onto the outside of the holder
- Then roll the holder in bird seed – it should stick to the peanut butter or honey
- Tie a piece of string or thread through the roll and tie a knot
- This scrummy bird treat can be hung in a tree or anywhere outside – try and hang it somewhere where you can watch the birds munching away without disturbing them

Can you identify which birds are coming to visit your feeder?
