

How to make a bubble horse tail

Step 1

Step 2

You will need:

- An old sock
- Washing up liquid
- Scissors or a knife and an adult helper

What to do:

1. Cut the end of a plastic bottle off (ask an adult to help you).
2. Using an old (but clean) sock, cover the cut end of the bottle to the toe of the sock.
3. In a shallow bowl add water and washing up liquid.
4. Dip the sock into the liquid liberally and blow hard through the mouth of the bottle to make a long, foamy bubble horse tail.

Step 3

Step 4

Try different types of sock to see what happens.

Add food colouring or paint and see if you can make unicorn tails.

Make two with a partner and see who can make the biggest tails.
