

Step 1

How to make a material pony

You will need:

Scissors, material, pattern, stuffing, wool, sewing needle and thread (optional glue gun).

What to do:

1. Cut out the pattern and place it on your material
2. Draw around the material and cut it out
3. Place the first body part, good side up, onto a flat surface and put the leg part on top with the wrong side facing up.
4. Sew (or glue) the two leg parts together to the markers indicated in step 4 image.
5. Fold the leg section in half and place the second body part on top, wrong side up, and sew the legs together as in step 5 image.
6. Sew the rest of the body parts together around the edges as in step 6 image but leave a small section so you can turn the whole thing inside out, so that the good side of material is on the outside.
7. Stuff with your stuffing to the desired level adding more if you want your pony to stand up.
8. Sew up the hole.
9. Add wool to make the mane, forelock and tail.
10. Add eyes and other markings if desired!
