

Making a Bug Hotel

1. With help from an adult helper. Cut 2 lengths of short wood and 2 lengths of long wood and screw or nail them together as shown.

2. Next, attach them together as shown to make a rectangle shape.

3. Add extra levels using off cuts of wood and nail them in place.

4. At each level, add pieces of sticks and hay or straw to make a comfortable place for bugs. Hang it somewhere safe and enjoy watching bugs move in!
