

How our Education and Equine Assisted Service Offer aligns with the new Devon Levels of Need Framework

The range of educational and Equine Assisted Services we offer meets the wide-ranging needs of children, young people and adults. We have overlaid onto the Devon Children and Families Partnership model our Equine Assisted Service offer to show the range of needs we can support through our different modalities at The Mare and Foal Sanctuary.

Equine Assisted Activities

At the Mare and Foal Sanctuary, equine assisted activities focus on gaining knowledge and skills centred around caring for equines which also develop transferrable life skills and can offer potential routes into employment.

Equine Assisted Learning

At the Mare and Foal Sanctuary, equine assisted learning focuses on person-centred learning outcomes which develop psychosocial and emotional learning skills and strategies.
